PUVIRAJ R

Smart Building Data Analyst | IoT & BMS Analytics | Team Leadership | Energy Operations
puvirajpuvi2309@gmail.com | +91 6374913771 | Dubai, UAE / Coimbatore, India | linkedin.com/in/puviraj-r-8a648016b

PROFESSIONAL SUMMARY

Smart Building Data Analyst with 1 year of hands-on experience delivering IoT onboarding, BMS data validation, and operational analytics across enterprise smart building portfolios in Dubai, backed by 3+ years of prior client-facing business experience. Built Python-based workflow automation frameworks that process high-volume telemetry datasets, reducing manual effort by 60% and accelerating onboarding cycles from weeks to same-day delivery. Currently leads a 6-member analytics team across multi-client deployments, mentoring junior analysts and coordinating with facility managers, vendors, and platform teams to deliver reliable, analytics-ready data.

CORE SKILLS

Languages & BI: Python (Pandas,RapidFuzz,OpenPyXL),SQL (MySQL, PostgreSQL),Power BI (DAX,Power Query),Excel (XLOOKUP, VBA),Looker Studio, AI Productivity Tools

Data Engineering: Fuzzy Matching,ETL Pipelines,Data Cleaning & Validation,Batch Processing,Data Standardisation,KPI Reporting

Domain: BMS,HVAC Analytics,IoT Data Processing(BACnet,Modbus,DDC,CAFM / CMMS)Smart Buildings,Energy Analytics

Leadership: Team Leadership (6 analysts),Sprint Planning,Training & Mentoring,Stakeholder Management,Client Presentations , Escalation Handling

Tools: IoT Platforms,Flutter,Jira,Agile,Google Sheets

PROFESSIONAL EXPERIENCE

Associate Energy Analyst
Jan 2025 – Present

Nectar Building Technologies Pvt Ltd - Coimbatore/Dubai, UAE (Onsite)

- **Automation Engine:** Built in Python (Pandas + RapidFuzz) — processes 100,000+ data points per batch in under 2 minutes using 5-tier fuzzy matching and equipment-type logic, cutting manual onboarding effort by 60% and compressing project timelines from 3 months to 1.5 months across all active client programmes.
- Delivered end-to-end BMS and IoT data onboarding across 100+ sites for 10+ enterprise clients (hotel, residential, commercial sectors) - validating HVAC, metering, chilled water, and IoT signals from Siemens and Schneider BMS platforms into analytics-ready datasets.
- Reduced field-to-platform data reconciliation from 3 days to same-day by designing structured data pipelines covering CAFM asset mapping, space hierarchy validation, and IoT sensor alignment — resolving 30+ critical integration mismatches in the process.
- Prepared validated datasets that power live Energy KPI dashboards, Asset Utilisation metrics, and Operational reporting — results directly referenced in client stakeholder review presentations.
- Leads a 6 member analytics team across sprint planning, task assignment, and output review; trained 3+ new analysts to independent delivery within one month and conducts regular knowledge-sharing and performance feedback sessions.
- Manages client escalations, leads delivery progress meetings, and coordinates across facility managers, BMS vendors, IoT teams, backend developers, and company leadership on concurrent multi-site programmes.

Relationship Manager
2023 – 2025

PNB MetLife Insurance Co Ltd – Coimbatore, Tamilnadu,India.

- Managed a portfolio of 10,000+ customer accounts; applied behavioural trend analysis and data segmentation to prioritise outreach, contributing to measurable improvement in cross-sell conversion and policy renewal rates.
- Produced structured performance reports and business analysis summaries to support operational decision-making and branch-level planning.

KEY PROJECTS

BMS Point Mapping Automation Tool (Python,Pandas,RapidFuzz,OpenPyXL)

- Designed and built a scalable BMS data standardisation engine using a 5-stage matching framework (Exact Match > Alias Mapping > Prefix Extraction > Substring Matching > Confidence Scoring), automating vendor point normalization and generating platform-ready Excel datasets with validation scores, exception flags, and zero naming-convention errors.
- Processes 100,000+ data points per batch in under 2 minutes; adopted as the team's standard tool across all client onboarding programmes and growing site portfolios.

Daily Activity Tracker - (Flutter, Excel / PDF Export)

- Built an offline-first mobile app adopted by all 6 team members within the first week, enabling task tracking across Client > Project > Task workflows, reducing manual reporting effort by 40%, and providing Excel/PDF exports for retrospective reviews.

Global Climate & Energy Dashboard (2020–2024) - (Power BI, DAX, Looker Studio)

- Built interactive multi-year energy and climate dashboards across both Power BI and Looker Studio with custom DAX measures, drill-down visuals, and dark-theme formatting - published as a LinkedIn portfolio project demonstrating cross-platform BI capability.

EDUCATION

MBA — HR & Business Analytics *2023-2025*
Tamilnadu College of Engineering, Coimbatore

B.E. — Mechanical Engineering *2017 -2021*
Tamilnadu College of Engineering, Coimbatore
